the

# Open House

**Invocation & Blessing by Bishop Ricardo Ramírez**

Join us as we showcase our eco-friendly and energy-efficient apartments made with compressed earth blocks, adobes. The CDC made the compressed earth blocks (adobes) in Las Cruces NM. Presentation topics include passive solar design, energy-efficient construction, community gardens, and Cultivando Tradición community garden project.

This dream started in 2004 with an idea from Carlos Corral, a founding member of the CDC. Constructed apartments celebrate his legacy.

We hope to see you there!

**¡Gracias!**

**Address: 414 St. Anthony St. in Anthony NM**
